

**The Apéro convection heater—
more efficient natural convection**

Warm air is directed forward to heat the room, not the wall. The result? The warm air mixes more quickly with ambient air, and the temperature is more even throughout the room.

**Conventional electric heating—
needlessly higher energy consumption**

Fan-forced and base-board heating is inefficient since the hot air is distributed vertically and accumulates below the ceiling (cushion effect). This results in heat losses through the wall on which the heater is mounted and through any adjacent windows.

Convectair offers solutions adapted to each client's specific needs, be they supplementary heating, home renovations and additions or complete home heating systems. Energy-efficient Convectair systems are available in a wide range of designs and power ratings, in 120 or 240 volts.

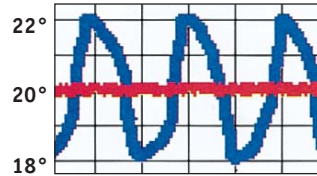

WARRANTY

Two years against all defects
Five years on the heating element

**The Convectair ultra-sensitive, built-in
electronic thermostat—accurate up to
1/5°F (1/10°C)—saves you save up to
30% on your heating bill!**

Temperature swings are limited to give you significant savings and optimal comfort.

■ Built-in electronic thermostat
■ Mechanical wall thermostat

A conventional fan-forced or base-board heater with a mechanical wall thermostat allows wide temperature swings of 9°F to 13°F (4°C to 6°C).

Heat that makes sense!

Perhaps you're looking for extra warmth and a dry towel, or a high-performance heater to back up your main heating source. Or perhaps you just want to feel comfortable in your favorite room. Whatever your need, Convectair has the right model for you. Our efficient units can transform any cold spot into a warm comfort zone.

Efficient, economical and safe. Providing gentle, even heat throughout any room, Convectair heaters are equipped with an efficient electronic thermostat that can save you up to 30% on your heating bill. And our safety features offer you much-needed peace of mind.

Quality products. With more than 20 years' experience in home electric heating, we put our knowledge to good use by designing products that last a lifetime. Every model is engineered and assembled by professionals, using high-quality components.

Simple and easy to use. Convectair units are user-friendly—simply plug them in! All are equipped with a thermostat so that you can set your own comfort zone, and our bathroom units come with a timer for heat that's almost instantaneous.

Eye-catching comfort. Because comfort shouldn't win out over esthetics, we've designed our Convectair models to fit any decor in your home.

PLUG-IN CORD - 120 VOLTS

This compact unit warms towels and bathrooms in record time! Perfect for people who like the comfort of quick heat (up to 1500 W, timer control) and the silence of natural convection heat (750 W, thermostat control).

Model	Catalogue No.	Color	Power	Height	Width	Depth
JAZZ	7618-B15	WHITE	120V 750-1500 W	in. 24 ¹ / ₄	in. 20 ¹ / ₈	in. 8 ⁵ / ₈

CSA- and UL-listed

Small on size and big on efficiency, the Calypso is equipped with an electronic thermostat for basic heating, and a fan and a timer for quick heat when you want it. Recommended for all bathrooms.

Model	Catalogue No.	Color	Power	Height	Width	Depth
CALYPSO	7825-B15	WHITE	120V 750-1500 W	in. 16	in. 12 ³ / ₄	in. 5 ¹ / ₂

CSA- and UL-listed

Compact and versatile, this diminutive fan-forced unit is a practical solution for occasional heating needs in small rooms such as bathrooms. It can be timer-controlled for quick heat whenever you need it. Extremely economical on space, it is designed for easy surface installation six feet from the floor.

Model	Catalogue No.	Color	Power	Height	Width	Depth
SOPRANO	7808-B15	WHITE	120V 750-1500 W	in. 8 ¹ / ₂	in. 12 ¹ / ₂	in. 5 ¹ / ₂

CSA- and UL-listed

An efficient multipurpose unit with a streamlined design that suits any decor and any room. Flexible enough to fit the den or the bedroom, the kitchen or the playroom, the solarium or the basement.

Model	Catalogue No.	Color	Power	Height	Width	Depth
