

Home Efficiency Expo

Are you building or remodeling a home?

Check out the expo for efficient construction & energy saving ideas

This **FREE** workshop is open to contractors, builders and the public. Attendees can come and go as their schedule allows.

No registration is required.

"I have attended larger shows, but the exhibitors at the Home Efficiency Expo in Decorah were very knowledgeable and friendly and they offered more one-on-one assistance than what I experienced elsewhere. These dealers were interested in hearing about what I wanted rather than just showing me what they wanted to sell."

HOME EFFICIENCY EXPO

**Thursday
March 19, 2009**

4:30 – 9:00 p.m.

**Nob Hill Supper Club
2955 U.S. Hwy. 52
Decorah, IA
(5 miles north of Decorah)**

Thursday, March 19, 2009
Schedule of Events:

4:30 -9:00 p.m.

Manufacturer Exhibit Booths

There will be representatives from manufacturers of geothermal heating and cooling systems, windows, insulation, ventilation and much more.

4:30-6:30 p.m.

Networking Dinner

A light dinner will be available for attendees. The exhibit booths will remain open for networking and questions.

USDA Rural Development representatives will be available to answer questions regarding the Energy Efficient and Renewable Energy Grants.

5:30-6:15 p.m.

Eric Skinner & Karl Oldenburg

Founders of Renewal Home Energy, a company dedicated to addressing energy issues with safety and economic payback in mind, Eric and Karl will provide information regarding home performance with Energy Star. Eric will focus on building new energy efficient homes and Karl will present information about comfort, safety, durability, and energy efficiency upgrades in existing homes.

7:00-8:30 p.m.

Patrick Huelman Presentation

Patrick is an associate professor in Residential Energy and Building Systems for the University of Minnesota. He has led training seminars for the home construction industry for nearly 30 years. His primary research interest is in the thermal and moisture performance of residential building systems, components, and materials. Patrick also is interested in residential indoor air quality and strategies for source control and innovative mechanical ventilation systems.

8:30-9:00 p.m.

Networking and Questions

Exhibit Booths

• **Geothermal Heating/Cooling**

• **Insulation**

• **Building Products**

• **Lighting**

• **Windows & Doors**

• **Electric Heating Products**

Have your questions answered regarding energy efficiency.
